

# Project Submission

## 1. My Calculator

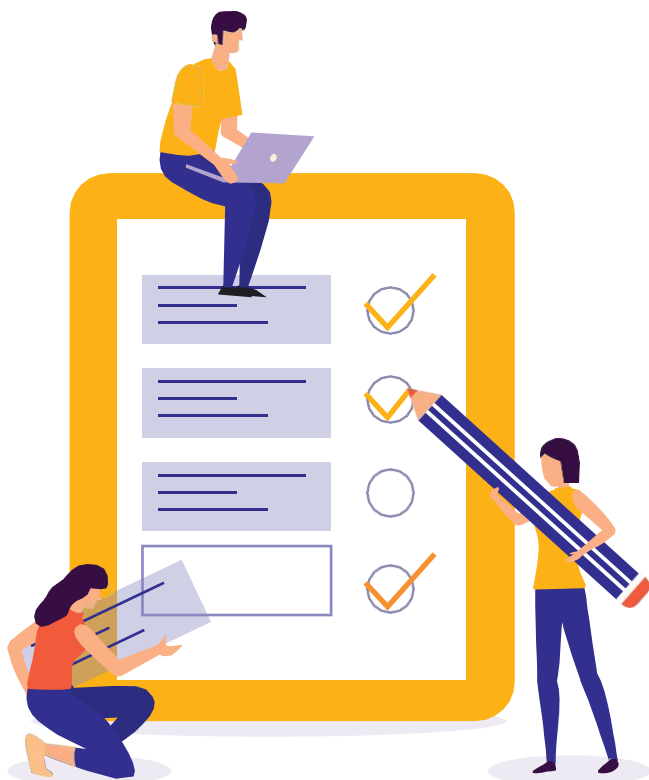

# 1 Brief on the Project

A brief report that describes the idea for a project, the work you intend to perform. In particular, it should identify the project type, the problem you plan to address, the motivation for why you find the problem important or interesting, any previous work you already know about, and a rough tentative approach to solving the problem.

## 2 Deliverables of the Project

A brief report that describes the idea for a project, the work you intend to perform. In particular, it should identify the project type, the problem you plan to address, the motivation for why you find the problem important or interesting, any previous work you already know about, and a rough tentative approach to solving the problem.

- List of questions your model problem are designed to answer
- Details of the model, important findings, expecting observations and outcome

## 4 Resources

**Data set source:** The report should also discuss sources of real-world data for your chosen application or how you plan to obtain real-world data. URL of the data set also should include in the report.

**Data set source:** The report should also discuss sources of real-world data for your chosen application or how you plan to obtain real-world data. URL of the data set also should include in the report.

**References:** Include 1-3 relevant papers which already discussed same/similar problems (not compulsory)
